

# WeatherCitizen

Shared Marine Observations via Smartphones

WeatherCitizen is a mobile device app that records marine data and observations for sharing with other users, social media, and the scientific community

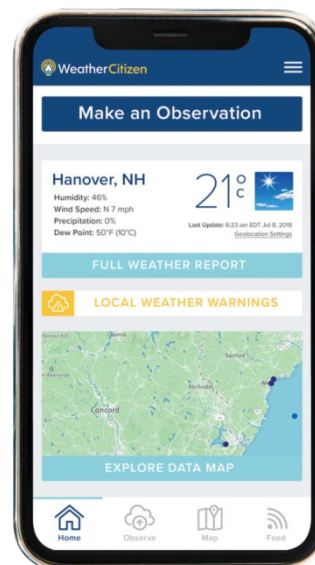

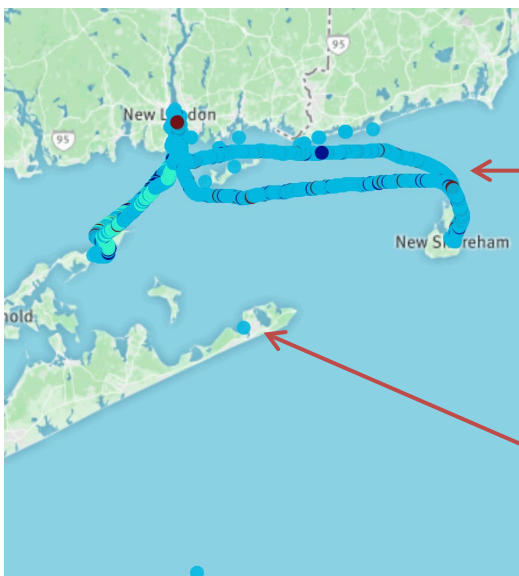

## Marine Observations via Smartphones

-  **Manual entry of text, audio, images**
-  **Automated polling of phone's internal sensors (P, T, RH)**
-  **Bluetooth monitoring of external weather stations and sensors**
-  **Geotagged, time-stamped data buffering on phone**

## WeatherCitizen

-  **Auto-upload to cloud-based server**
-  **Deliver maps and data to any Internet device**
-  **Display on Web pages and share via social media**
-  **Use data to improve marine weather forecasts**

## Data Sharing via weathercitizen.org
